Here we have, instead of a revenue from Public Works paid into the State, Treasury a deficit of \$157,057 17, for five years, drawn directly from taxes of the people.

This large deficit and expenditure from the State Treasury, above and beyond all revenue derived from these works, must, no doubt, be attributed in part to railroad competition for the carrying trade of the State, in part to failure of crops, but most of all to gross mismanagement and favoritism.

Mr. President, I have prepared a tabular statement, showing the names of the members of the Board of Public Works for the last ten years, and the several amounts of revenue derived from the Public Works and paid in THIS wonderful article, just patented, is something to the State Treasury during each fiscal year, entirely new, and never before affected to agents who are wanted everywhere.
